Question: When the Basic Intelligence Division, ORR, was established in 1947, what was the on duty strength?

Answer : Statistical data was not maintained below Office levels by this Office prior to 1953, hence, definite strength data by division is not available. However, we have determined from individuals who used to maintain the personnel records that the strength was about 20 to 22. Also we have learned that there were 22 positions provided for in the Fiscal Year 1948 budget and 25 in the Fiscal Year 1949 budget. Therefore, it appears reasonable that the strength of the Basic Intelligence Division was approximately 22 when it was established in 1947.
